The 21st Asian International Art Exhibition 2006

"21" hosted by Singapore features more than 178 paintings, sculptures, digital photographs and video works by important Asian artists from the region. Since 1985, the Asian International Art Exhibition (AIAE) has become an important platform for the promotion of art and cultural exchange among Asian countries.

The title of the exhibition reflects not only the number of successful presentations but also the theme - 21st century - to highlight the artistic responses to the globalised environment of today.
